

How to install a script

Installation:

1. Download the ZIP folder
2. Extract a JSX file from ZIP folder.
3. Place the `UPC12Barcode.jsx` file in:
Win (32 bit): C:\Program Files (x86)\Adobe\Adobe Illustrator [vers.]\Presets\en_GB\Scripts\
Win (64 bit): C:\Program Files\Adobe\Adobe Illustrator [vers.] (64 Bit)\Presets\en_GB\Scripts\
Mac OS: /Applications/Adobe Illustrator [vers.]/Presets.localized/en_GB/Scripts
4. Restart Illustrator
5. The script should be visible now under File > Scripts > UPC12Barcode

NOTE: The OCRB Std font needs to be installed on your computer. This font is available at the Adobe TypeKit: <https://fonts.adobe.com/fonts/ocr-b>

Place your barcode or barcodes numbers as 12 digit text in your open document. (Only one barcode number per frame or point text string).

Run the script.

The script will find all 12 digits strings and replace them with a working UPC12 barcode.

If the barcode is not correct, the alert will appear. Please ensure that the barcode number and the checksum are correct.

NOTE:

The OCRB Std font needs to be installed on your computer. This font is available at the Adobe TypeKit: <https://fonts.adobe.com/fonts/ocr-b>
